MECHANISMS MECCANISMI

PEPPER

SALT

WET SEA SALT

LONG PEPPER

CHILI PEPPER

NUTMEG

CINNAMON

FLAX SEED

PEPPER

Made of case-hardened steel for higher, more consistent output with fewer turns. Equipped with a helix-shaped double row of teeth that guide and hold the peppercorns for a perfect grind. The grind is essential for unlocking the full flavour of your pepper. To get the best out of your pepper grinding mechanism, we recommend to use peppercorns with a diameter of 6 mm or less. Black, white and dry green peppercorns can be ground in Peugeot pepper mills. The pink berries can be ground only if in a blend (max 15% pink) with one of these peppercorns. Dried coriander is also suitable for the pepper mechanism.

DRY SALT

The Peugeot salt mechanism is designed to grind cooking salt (rock salt). It is made of a special stainless steel that resists corrosion. Its shape is specifically adapted to transform dry salt crystals to a fine powder. To get the best out of your Peugeot salt grinding mechanism, you should use salt with a size of 4 mm max.

WET SEA SALT

For wet sea salt, a specially designed mechanism has been created because the natural consistency and moisture content do not allow the use of an ordinary salt mill. An innovative patented system enables a high-performance grind without blockage even with very humid or compressed salt. This specific mechanism is composed of 3 fins ensuring both resistance and constant output, and of an spiral that mixes the salt and guides it, ensuring a constant flow. Exclusive ceramic mechanism.

NUTMEG

The Peugeot nutmeg mill is equipped with a double stainless steel blade/grater and a strong claw which enables the nutmeg to be very finely ground.

CHILI PEPPER

The chili pepper mechanism is a Peugeot exclusive product. This patented model has a pre-cutting system and a mechanism that grinds dry chili pepper. Like the pepper grinder it has a patented treatment that protects the steel from corrosion while maintaining its sharpness and wear resistance.

PEPE

Realizzato in acciaio, beneficia di un trattamento che lo protegge dalla corrosione, conserva il potere tranciante e lo rende resistente all'usura. Dotato di una doppia fila di denti elicoidali che guidano i grani di pepe verso il basso. Trancia e non schiaccia i grani, per sprigionarne sottilmente sapore e profumo. Consigliamo di utilizzare grani di pepe con un diametro di 6 mm o meno. I grani di pepe neri, bianchi e verdi secchi possono essere macinati nei macinapepe Peugeot. Le bacche rosa possono essere macinate solo se in miscela (max 15% rosa). Il meccanismo del pepe è adatto anche al coriandolo essiccato.

SALE SECCO

Il meccanismo del sale è progettato per macinare il sale da cucina (sale grosso). È fatto di uno speciale acciaio inossidabile resistente alla corrosione. La sua forma è specificamente adattata per trasformare cristalli di sale secco in una polvere fine. Per un risultato ottimale si consiglia di usare sale con una dimensione di 4 mm max.

SALE MARINO UMIDO

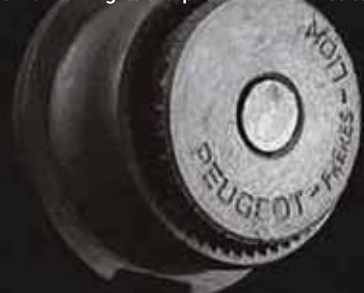

Per il sale marino umido, è stato creato un meccanismo apposito. Un innovativo sistema brevettato consente una macinatura ad alte prestazioni senza ostruzioni anche con sale molto umido o compresso. Il meccanismo è composto da 3 alette che ne garantiscono sia la resistenza sia un rendimento costante, e di una spirale che mescola il sale e lo guida assicurandone un flusso costante. Meccanismo esclusivo in ceramica.

NOCE MOSCATA

La macina è dotata di una doppia lama per grattugiare in acciaio inox e di un robusto dischetto uncinato che permette di grattugiare l'intera noce molto finemente.

PEPERONCINO

Questo meccanismo è un prodotto esclusivo Peugeot. Il modello brevettato ha un sistema di pre-taglio e un meccanismo che permettono di macinare il peperoncino essiccato. Come il macinapepe, il meccanismo subisce un trattamento brevettato che protegge l'acciaio dalla corrosione pur mantenendo la sua affilatura e resistenza all'usura.

ADJUSTABLE GRINDING SYSTEM

For electric or manual mills.

Patented precision system that enables precise grind adjustment settings. 6 pre-defined levels of grind for pepper and 6 for salt. Rotate the ring at the base of the mill and select one of the positions, each corresponding to a specific grain.

REGOLAZIONE DELLA MACINA

Per macine manuali ed elettriche.

Sistema brevettato che permette una regolazione predefinita della macinatura. 6 Livelli per il pepe e 6 Livelli per il sale. Ruotare l'anello alla base della macina e selezionare una delle posizioni, ognuna corrisponde ad una determinata grana.

CLASSIC ADJUSTABLE SYSTEM

Thumbwheel grind adjustment on electric grinders is found below the grinding mechanism. Grind adjustment nut on manual mills, turn the nut. Clockwise to obtain a finer grind, counter-clockwise to obtain a coarser grind.

REGOLAZIONE CLASSICA

Negli apparecchi elettrici la rotella di regolazione si trova sotto il meccanismo di macinatura. Negli apparecchi manuali la regolazione si effettua ruotando il dado/pomolino. Ruotare in senso orario per ottenere una macinatura più fine, in senso antiorario per ottenere una macinatura più grossa.
